Gary –

At the last facility decommissioning meeting Max had asked if we could provide a copy of the filter cake enclosure wipe test results collected by CBI in 2015. Two lab reports are attached. The 5/20/15 report shows results from two locations in the north filter cake enclosure following a water wash of the fabric. The 6/2/15 report shows results from the south enclosure fabric without any water washing step. Feel free to give me a call if you would like to discuss further. Thanks.
